PROFILE

Software Engineer specialized in **JavaScript, React, Tailwind CSS, custom CSS, Linux, and Elasticsearch**, with experience in **Full-stack Web Development and Network Administration**. Delivered projects including a multilingual recipe management system and a **corporate website upgrade for YACSN**, managing a year-long freelance project from start to finish. Strong skills in problem-solving, collaboration, and attention to detail.

WORK/PROJECT EXPERIENCE

TheRecipeBook (Final Year Project) October 2024 - May 2025

Full-Stack Developer

- Designed and developed a web-based meal planning and recipe management system.
- Delivered key features including multilingual support, a weekly meal planner, and an ingredient-based shopping list.
- Implemented secure authentication, personalized dashboards, and responsive design.
- Utilized MongoDB, Express.js, React.js, Node.js, Tailwind CSS, and custom CSS. [View Project](#)

YACSNWebsite (Upgrade)

June 2024 - September 2025

Freelance Web Developer

- Led the successful upgrade of a corporate website for YACSN, managing a year-long freelance project from start to completion.
- Oversaw a small team of developers, serving as the main responsible party for delivery, coordination, and project management.
- Implemented modern design, improved functionality, and optimized performance to meet client expectations.
- Gained valuable experience in collaboration, attention to detail, patience, and accountability while handling real client requirements. [View Project](#)
